Subject: Remedial Actions: **Red Horse Truck Stop** 1342 Trollingwood Road,
Mebane, Alamance County, Incident Number 10119, Risk Classification
HIGH

Dear Mr. Hall:

I have reviewed the GROUNDWATER SAMPLING REPORT for the August 1998 sampling episode for the Red Horse Truck Stop, submitted by S&ME, Inc. In the report there is a request for risk reclassification to LOW and site closure. I am willing to reclassify the site to a Low risk classification based on the low probability of the one proximate supply well becoming contaminated from the on-site release. But, before I can complete the process, you will need to document that the soil and groundwater contaminant levels are below the State's gross contaminant levels through the use of risk-based laboratory methods. Additionally, I would like a sample analysis from the supply well.

Also, as I have previously requested, please insure that the site name assigned by the State is used in all correspondence and on the cover of all reports. Please contact me at the letterhead address or telephone me at (910) 771-4608 ext. 282 with any questions.

Sincerely,

W. Waddell Watters
Hydrogeologist
